

Press Release 2/2018

15th German LS-DYNA Forum 2018 An excellent conference all round

Bamberg/Stuttgart, 24th October 2018

With more than 350 participants, 113 presentations, 9 workshops and 30 exhibitors, the LS-DYNA Forum 2018 was again an all-round successful event. The two and a half days in Bamberg were characterised by high-class presentations, inspiring discussions and a lively exchange of ideas.

The German LS-DYNA Forum has become a fixed date in the calendar of LS-DYNA users over the last few years. Also this time the attendees could inform and exchange in five parallel sessions about current trends and developments in LS-DYNA and LS-Opt as well as the corresponding CAE process chains.

In addition to the technical presentations, which provided insights into a variety of different applications, the popular workshops were also part of the agenda again. In nine workshops, the users had the opportunity to work intensively on various topics and deepen their expertise. The daily keynote presentations by renowned speakers from industry and academia rounded off the conference programme.

As always, the accompanying hardware and software exhibition offered plenty of opportunities for conversations. In a relaxed atmosphere this was the ideal place to discuss own topics with other users, to foster existing contacts and to find new ones. The range of present exhibitors once again clearly showed how diverse and extensive the application possibilities of LS-DYNA are.

At this point, DYNAmore would like to thank all involved for a successful conference. Without the dedication and commitment of the participants, exhibitors, session chairs and everyone else involved, a conference of this size would not be possible.

The presentations of the conference will soon be published on the DYNAmore website at www.dynamore.de.

The next event is the 12th European LS-DYNA Conference 2019. From 14-16 May DYNAmore welcomes all LS-DYNA users to Koblenz, Germany. The Call for Papers is already running. DYNAmore is looking forward to numerous submissions and many participants.

About DYNAmore

DYNAmore is dedicated to support engineers in solving nonlinear mechanical as well as multiphysical problems numerically. The product portfolio includes the finite element solver LS-DYNA, the pre- and post-processor LS-PrePost and the optimization software LS-OPT as well as numerous finite element models needed for crashworthiness simulation. The main field of activity is to sell, teach, support, and co-develop the software LS-DYNA and LS-OPT. In addition, DYNAmore provides engineering services for numerical analysis and integrate simulation software in the CAE environment.

DYNAmore offers training including seminars, workshops, webinars, support and information days as well as LS-DYNA user conferences. More detailed information can also be found on our support and tutorial websites. DYNAmore is one of the first addresses for pilot studies and development projects with respect to the simulation of nonlinear dynamic problems. You will find DYNAmore in Stuttgart, Dresden, Ingolstadt, Berlin, Langlingen, Zurich (CH), Linköping (S), Gothenburg (S), Turin (I) and Dublin (USA).
