It is a pleasure to invite you to the Nordic LS-DYNA Users' Conference 2018. From 18th to 19th October, LS-DYNA users from the Nordic countries, the Baltic states and the rest of Europe will meet at the Gothia Towers in Gothenburg, Sweden.

The conference will provide a great opportunity to share and discuss experiences, to obtain information on upcoming features in LS-DYNA, LS-OPT and LS-PrePost and to learn more about new application areas.

The central part of the event will be the user presentations on the software and its usage. This is the ideal forum to discuss your experiences with LS-DYNA and LS-OPT with other expert users in simulations of complex mechanical problems.

Besides presentations from users, there will be also selected keynote lectures of renowned speakers from industry and universities as well as developer presentations from LSTC and DYNAmore GmbH. The popular workshops on various topics will also be continued.

We are looking forward to welcoming you!

We will have user presentations from all LS-DYNA and LS-OPT applications. Following presentations have been already confirmed:

Keynotes

- Jason Wang, LSTC
- n.n., Volvo Car Corporation
- Niclas Brännberg, NIO

Users

- Autoliv Research
- Chalmers University
- Dynamore GmbH
- DYNAmore Nordic
